## MOTORHOME TOWING BRACKET PRICE LIST-2014 PLEASE READ THESE NOTES FIRST - IT WILL HELP

### How to use this motorhome towbar application guide:

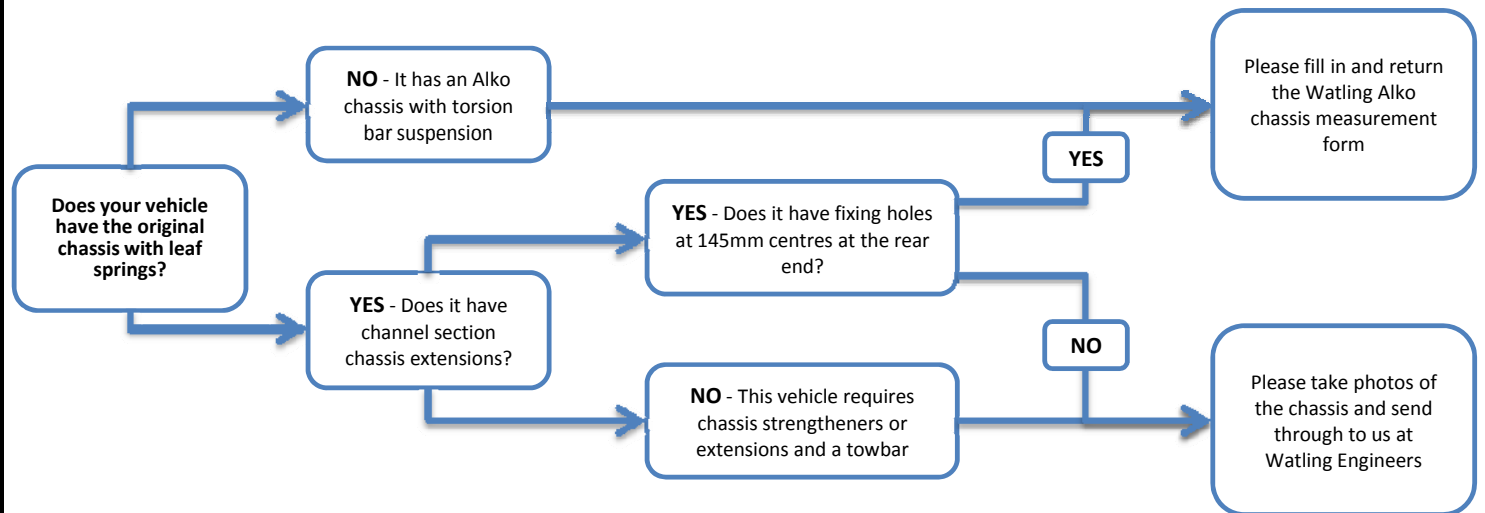

Please be aware that although this is the most comprehensive guide to motorhome towbars available anywhere, this is not an exhaustive list. If your vehicle is not listed, please use the notes below to help. In some cases, we may ask you to email photos of the chassis and extensions.

Generally speaking, if your vehicle was registered before April 2012, is not listed below and does not have an Alko chassis then it is likely to need a bespoke towbar designed and fitted at our factory.

For vehicles registered after April 2012 and not listed here, please use our flow chart below to help determine which towbar is required.

**How do I know if my vehicle has an Alko chassis or not?** Look at the rear suspension. If you have torsion bar suspension then you do have an Alko chassis. If you have leaf springs then you do not have a full Alko chassis.

If all else fails, call Watling Engineers on 01727 873661 and we will help to determine the most suitable towbar for your vehicle.

This list is updated at regular intervals, so if your vehicle is not listed please phone to check.

For most other motorhomes we can design, manufacture and fit a special towing bracket.

Where new models have the same name as or replace the previous versions, please note the change date and series numbers.

**NOTE: The dates given are for the vehicle chassis manufacture, the registration of the motorhome can be some time later. Prices quoted are for the towbar only unless specifically stated - towballs, wiring kits and carriage can all be added**

MOTORHOME TOWBAR ACCESSORIES AND ELECTRIC		price £
2 Bolt flange towball and Watling Cover		8.50
Locking pin for detachable PAK2, PAK4, PAK6, PAK7, PSW1, PAT2, PEG1 towbars		27.50

## ADDITIONAL NOTES ON MOTORHOME TOWBARS

Although there is some debate as to when exactly a Type Approved towbar should be fitted to a motorhome, and it can be difficult to tell if a vehicle is actually Type Approved itself, we have drawn a line in the sand at '12 plate' registrations from 1st April 2012. As a result, customers have several choices which we have tried to outline below:

Vehicle Registration Date	Towbar Options
Before April 2012 e.g. '60', '11', '61'	Non approved towbar can be fitted and used as normal Type Approved towbar can be fitted and used as normal
After April 2012 e.g. '12', '62', '13' etc.	Non approved towbar can be fitted but used only for bicycle rack support, motorbike or scooter rack support, other load carrying devise Type Approved towbar should be used for all towing applications
